---

## SUMMARY

"I am a computer science graduate with a strong passion for web development using PHP and the Laravel framework. With 3 years of experience in databases (MySQL) and 2 year in Laravel, I am eager to contribute to a dynamic development team. My strengths include problem-solving, API development, and a keen ability to learn and adapt quickly."

---

## WORK EXPERIENCE

### Backend Laravel Developer CodeTime

jan 2025 - till now

- Developed and maintained web applications using Laravel.
- Improved application performance by optimizing database queries.

### military service

dec 2023 - dec 2024

- Developed and maintained web applications using Laravel.
- Improved application performance by optimizing database queries.

### Backend Laravel Developer Devolum,1 year

dec 2022 - Dec 2023

- Developed and maintained web applications using Laravel.
- Improved application performance by optimizing database queries.
- Collaborated with front-end developers to integrate user-facing elements.

### Laravel Backend Developer (Trainee) SCOPELINKS Company, 3 month

sep 2021 - nov 2021

- Assisted in developing backend functionalities for various projects.
  - Implemented RESTful APIs for seamless data exchange.
  - Participated in code reviews and provided feedback.
- 

## PROJECTS

### M3aak (Live Project)

- Developed backend functionalities using Laravel.
- project created for schools to track school busses and students

### ifitcloud (Live Project)

- Developed backend functionalities using Laravel.
- project created for gyms and fitness

## Dhabeeh – Online Slaughter Ordering App

- Developed a RESTful API for a slaughter ordering mobile app using Laravel. The backend handles user registration, order placement, coupon management, and admin dashboard control. Integrated soft delete with user restore functionality, and managed roles and permissions using Spatie. Admin panel built using Filament

## Jomla – Wholesale Ordering Platform

- Built the backend for a wholesale e-commerce mobile app using Laravel. Developed a scalable RESTful API to manage bulk product listings, user orders, coupon application, and a powerful admin dashboard. Ensured secure authentication, role-based access, and seamless communication between backend and mobile frontend.

## Medical Online Support (Graduation Project)

- Created a platform for online medical consultations.
- Designed and implemented database schemas using MySQL.

## Chatting API (Self-Study Project)

- Built a real-time chat application API.
- Utilized WebSockets for instant messaging

## E-commerce (Self-Study Project)

- Developed backend functionalities using Laravel.
- An online shopping website that displays a collection of products

## library(Self-Study Project)

- Developed backend functionalities using Laravel.
- An online shopping website that displays a collection of books

---

## EDUCATION

### Mansoura University Bachelor of Computer Science

Graduation: 2022

University of Engineering and Technology

- Notable coursework: Algorithms, Data Structures, Database Management

### Consulting Of Computers And Information Training Course of Back End Development

Aug 2020 - Oct 2020

- Achieved Excellent Degree

---

## ADDITIONAL INFORMATION

### Technical Skills:

- PHP (Advanced) , HTML/CSS (basic)
- Javascript (intermediate) , OOP (Advanced)
- Laravel (Intermediate) , SQL (Intermediate)
- Vue.js (intermediate) , C# (Basic)
- GIT/ GitHub(Intermediate) , RESTful APIs (Intermediate)
- Problem Solving (Advanced) , Communication (Advanced)
- Teamwork (Advanced)

### Languages

- English
- Arabic
