PROJECTS

Smart Vision [🔗](#), *Company Portfolio [Live]*

- Developed and maintained scalable backend systems and RESTful APIs for a software solutions company website, enabling efficient content management and service presentation.
- Implemented database relationships, authentication features, and API integrations while ensuring performance, security, and maintainability.

HAT-TRICK Platform [🔗](#), *Football Social & Scouting Platform [live]*

Football-focused social networking and scouting platform available as a web and mobile application. The platform supports multiple account types including players, coaches, clubs, agents, scouts, and football communities, enabling networking, player discovery, recruitment, and football content sharing.

Responsibilities & Features:

- Developed and maintained scalable RESTful APIs using Laravel.
- Implemented multi-role authentication and authorization system.
- Built football social features such as posts, interactions, comments, messaging, and notifications.
- Developed club/player management workflows and recruitment features.
- Integrated media uploads and profile management for different user types.
- Optimized backend performance and database relationships.
- Collaborated with mobile application integration and API consumption.

FTtech [🔗](#), *Mobile App Backend [Live]*

- Developed backend APIs for a production mobile application ensuring secure authentication and smooth data exchange.

Matlabk Platform [🔗](#), *Web & Mobile App [live]*

- Built and maintained scalable backend APIs using Laravel serving real users across both web and mobile platforms.
- Designed and optimized database queries to improve system performance at scale.

Emaan Platforms [🔗](#), *3 Websites [Live]*

- Developed and maintained backend systems for three related Laravel websites.
- Built and optimized RESTful APIs, managed database operations, and ensured smooth multi-platform operation.

Class Car [🔗](#), *Company Portfolio [Live]*

- Developed backend system to manage car listings, brands, vehicle details, and cash/installment plan features.
- Built and integrated APIs with the website frontend for dynamic content management.

Alfawz Platform [🔗](#), *Contracting Company [Live]*

- Implemented service management and project modules, client inquiry forms, and dynamic database-driven content for a contracting company website.

Dhabeeh [🔗](#), *Online Slaughter Ordering App [Live]*

- Developed a full RESTful API using Laravel for a slaughter-ordering mobile app handling user registration, order placement, and coupon management.
- Implemented role-based access control and permissions management with Spatie; admin panel built using Filament.
- Added soft-delete with user restore functionality for safe data management.

Jomla, *Wholesale Ordering Platform*

- Built the entire backend for a wholesale e-commerce mobile app including bulk product listings, user orders, and coupon application.
- Designed a scalable RESTful API with secure authentication and role-based access; seamless communication with mobile frontend.
